Project Management

The project will follow the phased development approach of the **DATA EXPRESS CONSULTING CENTER** Lifecycle. A standard lifecycle provides repeatable processes and deliverables in a phased delivery approach that ensures a clear communication of scope, progress and status during each phase of the project.

Data Management

Accelerate deployment and/or migration of your Universal Database (UDB) solution—and ensure that the underlying storage infrastructure is fully optimized to support your IT and business objectives. The Database Layout Accelerator solution is a best-practices engagement that provides recommendations for—and implementation of—an optimized DB2 database on storage. With this proven solution you can.

WEB & E-Business SOLUTIONS

The traditional business environment is changing rapidly as customers and businesses seek the flexibility to change trading partners, platforms, carriers and networks at will. Many companies are looking outside their organizations as well as within when shaping their business strategies.

Security SOLUTIONS

At Data Express Zone we providing security solution for Business, transportation, utilities, banks and public administration are increasingly reliant on networked information systems. The success of holistic e-government and e-business strategies requires solutions that enjoy broad public trust. Reliable IT-Security solutions for protecting data and communication media effectively are a must.

Telecommunication

The Telecommunication Networks Internet telephones provide support for a wide range of today's high-value e-Business applications, including Call Pilot Unified Messaging and Symposium Call Centre services. This rich, future-proof feature set will evolve to support advanced services such as voice activated dialing and corporate and personal directory services.

Networking

With the vast increase in computer technology over the last few decades there is a great need to share computer peripherals and back up devices by networking two or more computers together. There are many different reasons for needing a network in a home or an office and there are various methods that can be used depending on the requirements.

Power line Communication

Connecting to the Internet is a fact of life for business, government, and most households. The lure of e-commerce, video on demand, and e-mail has brought 60 million people to the Internet. Once they get to the Internet, they find out what it's really like. That includes long waits for popular sites
